Red: when heating
Orange: at a proper temperature

Metal Handle

To protect the knob from a dog bite

Temp-adjustment knob

Turn CW: Hot
Turn CCW: Cool

Customer review:

"Wanko" helps my dog stay cool

I bought against the summer heat prevention for ailing female dog, mixed with Japanese Shiba and Spitz.

In before my dog slept on the cooling gel mat, but she waken at night after sleeping 2 hours due to moisture or uncomfortable ride. She, however, rides and sleeps on "Wanko" from the beginning. She achieves a good night's sleep every night.

Through trial and error, I found the best temperature for her: 22°C (=72°F). When room temperature is lower than 23°C (=74°F) by the air-conditioner, she sleeps on the floor. When it is higher than 23°C, she sleeps on the "Wanko". Cool flat aluminum plate is the best to ensure the free passage as her please.

I cover the aluminum plate with my used clothing to avoid dew. Since the width of the shirt is almost the same as the aluminum plate, it is easy to cover.

In addition, my dog relaxes on it.

Japanese handmade product makes me happy.
